

General Information

IES Juan Rubio Ortiz is a High school and Technical College in Almeria. Our school is a public one belonging to the Junta de Andalusia. It offers two Vocational Training Upper courses: International Trade and Industrial Automation and Robotics.

The school structure: Administration: Principal, Head of Studies, and a Secretary; 21 Teaching departments:

- International Trade department;
- Automotive department;
- Electric Maintenance department
- Biology and Geology department;
- Classical Culture department;
- Drawing department;
- Philosophy department;
- Physical Education department
- Chemistry and Physics department
- English Language department
- French Language department
- Natural Science department
- Geography and History department;
- Spanish Language and Literature department;
- Mathematics department
- Music department
- Orientation department;
- Technology department;
- Religion department;

Other departments:

- Work Orientation Department
- Extracurricular Department
- Innovation Department
- Internalization Department

Within each department there is a head of department in charge of coordinating each department.

Apart from this, there are groups of tutors in charge of every group in our high school.

The Head Teacher and his team, departments and the teaching staff work together to develop the different didactic programs, teaching contents, innovation, and others.

Task division

The Head of Studies and his team are in charge of elaboration and supervision of the Internalization global strategy; institutional agreements with different public and private centers; establishment of measures to recognize the studies; guarantee the full recognition of the activities, etc.

Internationalization Department is responsible for contact and processing the agreements between institutions; assisting the students on linguistic level (English as a L2), coordination of the mobility projects, academic and cultural immersion of the pupils and the obtaining of visa application, health insurance and other documents.

Innovation and Communication Department is in charge of updating the information concerning the European projects, the educational offer catalogue and other information of interest.

Our aim is to work in collaboration with other centers and companies internationally as well as promote an European dimension to offer our pupils and staff a cultural and professional perspective.

Contact

The governing board together with heads of the International Trade department, Industrial Automation and Robotics Head and the head of the English Language Department are charge of the relationships with the European projects.
